

## **Automated Communications Exchange System - ACES Release Notes - November 12, 2002**

On Monday, November 11, 2002, a new release of ACES was implemented. The following is a listing of the changes that will reflect in ACES on Tuesday, November 12, 2002.

### **Participant Inquiry:**

Transactions now entered through ACES will identify the user who input the transaction. On the enrollment tab, if you click on the transaction and scroll down to the bottom of the page you see the User ID field. ACES will no longer populate the User ID field with "abtexter", it will populate with the login of the User who input the transaction, i.e. 1907KGAI.

### **ACES Processing Summary Report:**

The ACES Processing Summary Report that users receive by email has a different look. In order to make it more user friendly, text has been added to define the report and reference how to locate the Detail Processing report.

There are two problems currently being worked on:

- 1) Some Processing Summary Reports are not showing newly processed batches. If your submitted batch does NOT show as updated, please go to the Status folder in ACES, select Retrieve Files and locate your Detail Processing Report. This will show your processed transactions for that batch.
- 2) The Outstanding Transaction Line on the Processing Summary Report is reflecting incorrect counts. Please disregard this line until further notice.

CalPERS hopes to have resolution to these two problems by next week and will keep users advised.

A copy of this Release Note and previous ACES Notifications and Release Notes are available at <http://www.calpers.ca.gov/aces/whats-new.htm>

If you have any questions or concerns, please contact the ACES Employer Assistance Center at 1-888-Cal-PERS (225-7377). Thank you.
